Young Connecticut Scientists to be Awarded the H. Joseph Gerber Medal of Excellence

Hartford, CT – Three outstanding young Connecticut scientists will be awarded the newly established H. Joseph Gerber Medal of Excellence at the 32nd Annual Meeting and Dinner of the Connecticut Academy of Science and Engineering on May 22, 2007, at the Hilton Mystic Hotel in Mystic, Connecticut.

The award, created by the Connecticut Academy of Science and Engineering with the sponsorship of Gerber Scientific, Inc., is in recognition of H. Joseph Gerber's (1924-1996) technical leadership in inventing, developing and commercializing manufacturing automation systems for a wide variety of industries, making those industries more efficient and cost-effective in a worldwide competitive environment.

As an inventor and as founder, Chief Executive Officer, Chairman of the Board and President for Gerber Scientific, Inc., Mr. Gerber was a leader for nearly half a century in inventing and producing factory automation equipment designed to solve global manufacturing problems. An elected member of the National Academy of Engineering and the Connecticut Academy of Science and Engineering, Mr. Gerber received the National Medal of Technology in 1994 followed by the Connecticut Medal of Technology in 1995.

The recipients of this year's H. Joseph Gerber Medal of Excellence are 2007 Connecticut Science Fair winners Russell L. Slater (1st Place, Life Sciences - Senior Division) and George J. Hansel (1st Place, Physical Sciences - Senior Division) both of Greenwich High School in Greenwich, CT, and the 2007 Connecticut Science Challenge winner Miles C. Lubin of Staples High School in Westport, CT (1st Place).

Slater's winning Science Fair entry was entitled "*Medicated Hydrophillic Wound Dressings*" and Hansel's award was for his project on "*New Techniques in Fluorescence Microscopy*." Lubin, the winner of the Connecticut Science Challenge, and also a Semi-finalist in the National Intel Science Talent Search, won for his project on "*A Parametric Statistics-based Heuristic for Finding the Nearest Neighbor in Metric Space*"

Gerber Scientific is the world's leading supplier of sophisticated automated manufacturing systems for sign making and specialty graphics, apparel and flexible materials, and ophthalmic lens processing. Headquartered in South Windsor, Connecticut, the company operates through four businesses: Gerber Scientific Products, Spandex Ltd., Gerber Technology, and Gerber Coburn.

The Connecticut Academy of Science and Engineering was chartered by the General Assembly in 1976 to provide expert guidance on science and technology to the people and to the state of Connecticut, and to promote the application of science and technology to human welfare and economic well being. For more information about the Academy, please see www.ctcase.org.
